### **About the Workshop :**

Research provides us new domain of knowledge, new theories and laws, solution to a problem and open new areas of thought. Further it has the potential to question and analyse the existing theories in accordance to the present circumstances. Hence it is important for educational professional to be acquainted with the process of research i.e. research methodology. It is worth to mention that research is a systematic process and the knowledge of research methodology help to understand what to do in specific situation. Therefore it is very much important for a researcher to know all the aspects and steps of research process in order to make it systematic to a greater degree and hence, to stop the question to the reliability and validity of his/her work. This Training Course on Research Methodology will make the young researcher familiar with the various aspects, tools and steps of conducting Education & social science research. The participant will be introduced to various methods of research. That is quantitative, qualitative as well as mixed method approach. Special emphasis will be given to qualitative approaches like phenomenology, ethnography, ethno-methodology etc.
