Elite:

The word 'elite' has been one of the most general terms to be used in descriptive studies, and almost any powerful, advantaged, qualified, privileged, or superior group or category has been called an elite: politicians, bishops, intelligent people and successful criminals, to name just a few.

This class of elite is further sub-divided into: (i) a **governing elite**; and (ii) a **non-governing elite**. The 'governing elite' comprises of individuals who directly play some considerable part in government. They wear labels appropriate to the particular political offices, namely, ministers, legislators, president, secretaries and so on. The 'non-governing elite' are those people not connected with the governmental activities.
