

Introduction to Biostatistics

Deepa Anwar

Biostatistics

- (a portmanteau word made from biology and statistics)
- The application of statistics to a wide range of topics in biology.

➡ **Biostatistics**

It is the science which deals with development and application of the most appropriate methods for the:

- Collection of data.
- Presentation of the collected data.
- Analysis and interpretation of the results.
- Making decisions on the basis of such analysis

Other definitions for “Statistics”

- Frequently used in referral to recorded data
- Denotes characteristics calculated for a set of data :
sample mean

Role of statisticians

-  To guide the design of an experiment or survey prior to data collection
-  To analyze data using proper statistical procedures and techniques
-  To present and interpret the results to researchers and other decision makers

Sources of data

```
graph TD; A[Sources of data] --> B[Records]; A --> C[Surveys]; A --> D[Experiments]; C --> E[Comprehensive]; C --> F[Sample];
```

Records

Surveys

Experiments

Comprehensive

Sample

Types of data

Constant

Variables

Types of variables

```
graph TD; A[Types of variables] --> B[Quantitative variables]; A --> C[Qualitative variables]; B --> D[Quantitative continuous]; B --> E[Quantitative discrete]; C --> F[Qualitative nominal]; C --> G[Qualitative ordinal];
```

Quantitative variables

Quantitative
continuous

Quantitative
discrete

Qualitative variables

Qualitative
nominal

Qualitative
ordinal

Methods of presentation of data

- ① Numerical presentation
- ② Graphical presentation
- ③ Mathematical presentation

1- Numerical presentation

Tabular presentation (simple - complex)

Simple frequency distribution Table (S.F.D.T.)

Title

Name of variable (Units of variable)	Frequency	%
- - Categories -		
Total		

Table (I): Distribution of 50 patients at the surgical department of Alexandria hospital in May 2008 according to their ABO blood groups

Blood group	Frequency	%
A	12	24
B	18	36
AB	5	10
O	15	30
Total	50	100

Table (II): Distribution of 50 patients at the surgical department of Alexandria hospital in May 2008 according to their age

Age (years)	Frequency	%
20-<30	12	24
30-	18	36
40-	5	10
50+	15	30
Total	50	100

Complex frequency distribution Table

Table (III): Distribution of 20 lung cancer patients at the chest department of Alexandria hospital and 40 controls in May 2008 according to smoking

Smoking	Lung cancer				Total	
	Cases		Control			
	No.	%	No.	%	No.	%
Smoker	15	75%	8	20%	23	38.33
Non smoker	5	25%	32	80%	37	61.67
Total	20	100	40	100	60	100

Complex frequency distribution Table

Table (IV): Distribution of 60 patients at the chest department of Alexandria hospital in May 2008 according to smoking & lung cancer

Smoking	Lung cancer				Total	
	positive		negative			
	No.	%	No.	%	No.	%
Smoker	15	65.2	8	34.8	23	100
Non smoker	5	13.5	32	86.5	37	100
Total	20	33.3	40	66.7	60	100

2- Graphical presentation

1 *Graphs drawn using Cartesian coordinates*

- Line graph
- Frequency polygon
- Frequency curve
- Histogram
- Bar graph
- Scatter plot

2 *Pie chart*

3 *Statistical maps*

Line Graph

Year	MMR
1960	50
1970	45
1980	26
1990	15
2000	12

Figure (1): Maternal mortality rate of (country), 1960-2000

Frequency polygon

Age (years)	Sex		Mid-point of interval
	Males	Females	
20 -	3 (12%)	2 (10%)	$(20+30) / 2 = 25$
30 -	9 (36%)	6 (30%)	$(30+40) / 2 = 35$
40-	7 (8%)	5 (25%)	$(40+50) / 2 = 45$
50 -	4 (16%)	3 (15%)	$(50+60) / 2 = 55$
60 - 70	2 (8%)	4 (20%)	$(60+70) / 2 = 65$
Total	25(100%)	20(100%)	

Frequency polygon

Age	Sex		M-P
	M	F	
20-	(12%)	(10%)	25
30-	(36%)	(30%)	35
40-	(8%)	(25%)	45
50-	(16%)	(15%)	55
60-70	(8%)	(20%)	65

Figure (2): Distribution of 45 patients at (place) , in (time) by age and sex

Frequency curve

Histogram

Distribution of a group of cholera patients by age

Age (years)	Frequency	%
25-	3	14.3
30-	5	23.8
40-	7	33.3
45-	4	19.0
60-65	2	9.5
Total	21	100

Figure (2): Distribution of 100 cholera patients at (place) , in (time) by age

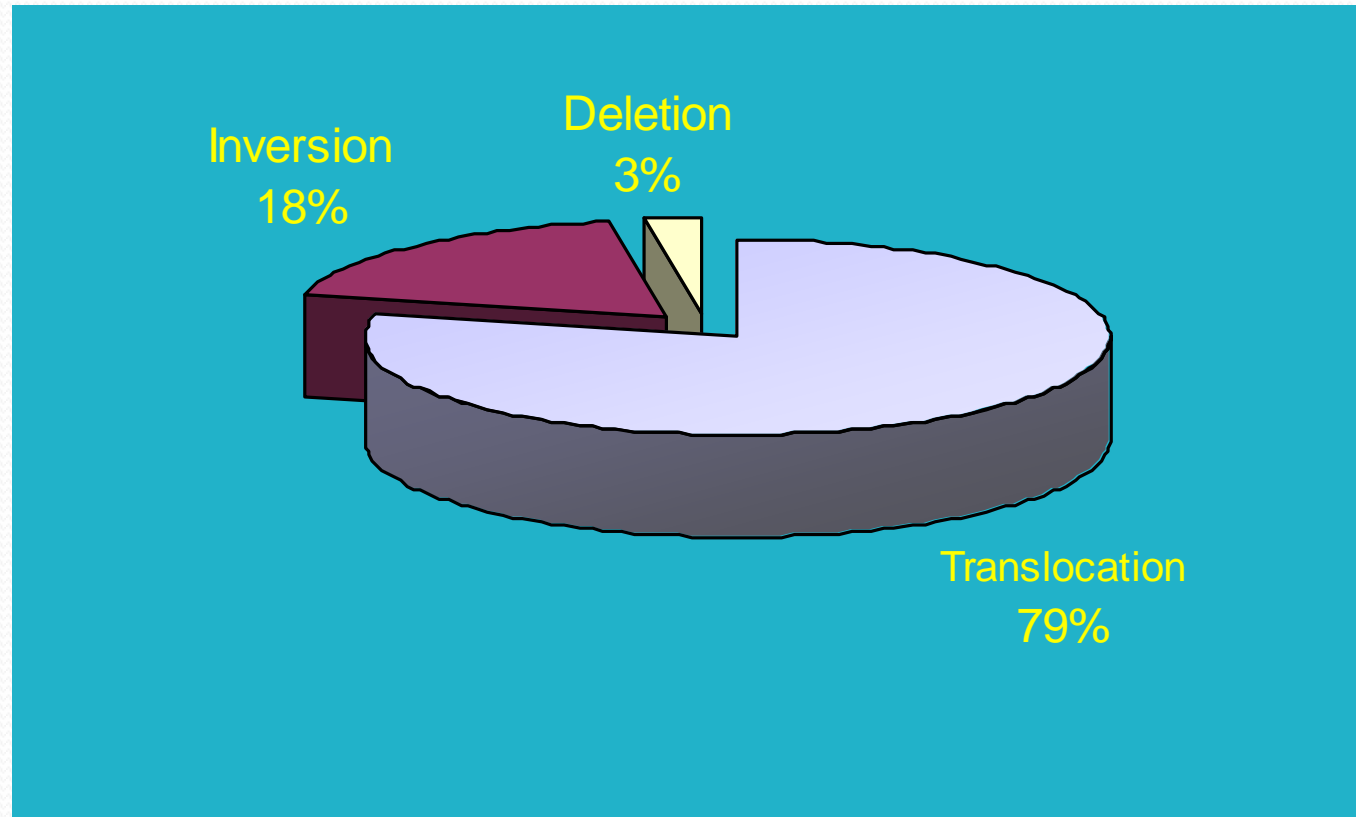

Bar chart

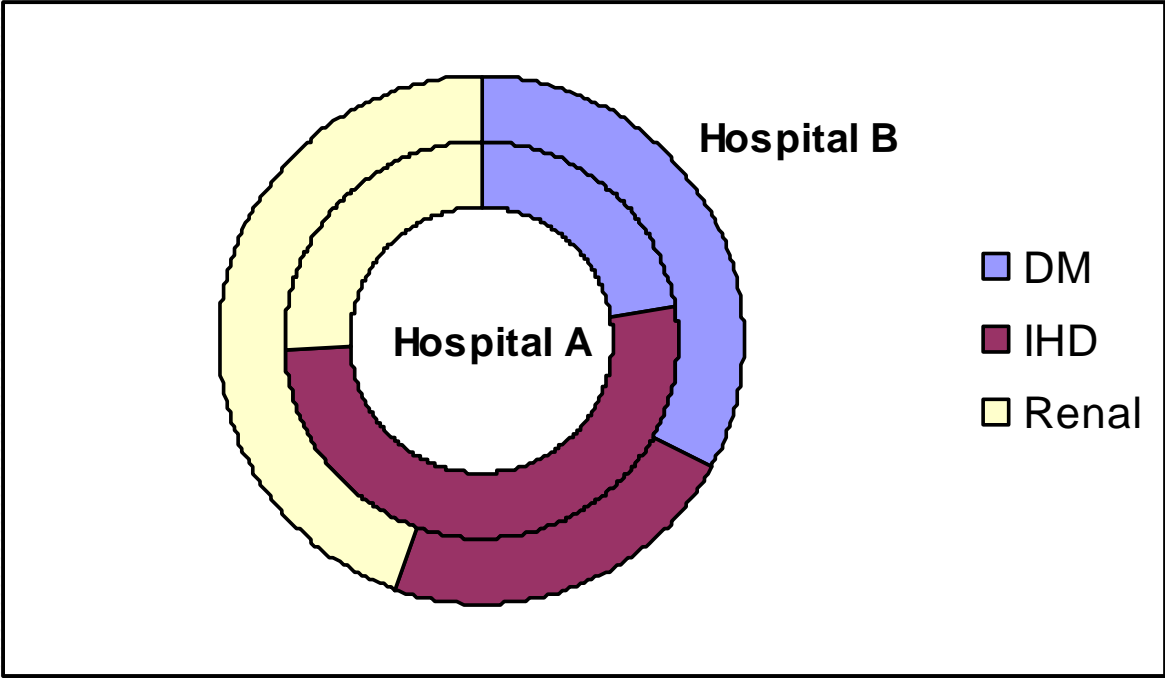

Bar chart

Pie chart

Doughnut chart

3-Mathematical presentation

Summery statistics

- Measures of location
 - 1- Measures of central tendency
 - 2- Measures of non central locations
(Quartiles, Percentiles)
- Measures of dispersion

Summery statistics

1- Measures of central tendency (averages)

Midrange

Smallest observation + Largest observation

2

Mode

the value which occurs with the greatest frequency i.e.
the most common value

Summery statistics

1- Measures of central tendency (cont.)

Median

the observation which lies in the middle of the ordered observation.

Arithmetic mean (mean)

$$\frac{\text{Sum of all observations}}{\text{Number of observations}}$$

Measures of dispersion

- ⇒ Range
- ⇒ Variance
- ⇒ Standard deviation
- ⇒ Semi-interquartile range
- ⇒ Coefficient of variation

- ⇒ “Standard error”

Standard deviation SD

Mean = 7
SD=0

Mean = 7
SD=0.63

Mean = 7
SD=4.04

Standard error of mean SE

A measure of variability among means of samples selected from certain population

$$SE \text{ (Mean)} = \frac{S}{\sqrt{n}}$$
